**TRUST  
TELECOM**

## ABOUT US

Trust Telecom is an international carrier providing telecommunication solutions and services around the world. We specialize in delivering only high quality and stable VoIP termination services at competitive pricing to mobile, broadband and carrier customers since 2018. Due to our strategic partnerships in the Middle East, Europe and North African regions, we have built expansive, reliable and strong IP Based networks for voice, A2P messaging and value added services. Our goal is to optimize service quality and cost effectiveness with peerless termination and transit IP solutions. Through more than 100+ interconnections with operators, PTT's and Tier-1's, we deliver full range of routing and termination solutions for international voice and messaging traffic.

## OUR VALUES

Our **T**ransparent business model leads to strong relationships with our global clients.

Our continuous investment in state-of-the-art infrastructure results in scalable growth and **R**eliability.

Our **U**niversal presence empowers us to deliver the high voice quality our clients need with extensive coverage and expertise.

Through our renowned local expertise in emerging markets, you can achieve the combination of price, quality and **S**tability.

The dynamic business environment has proven that with the right partner and **T**eamwork, you can optimize your communication needs to achieve imperative success.

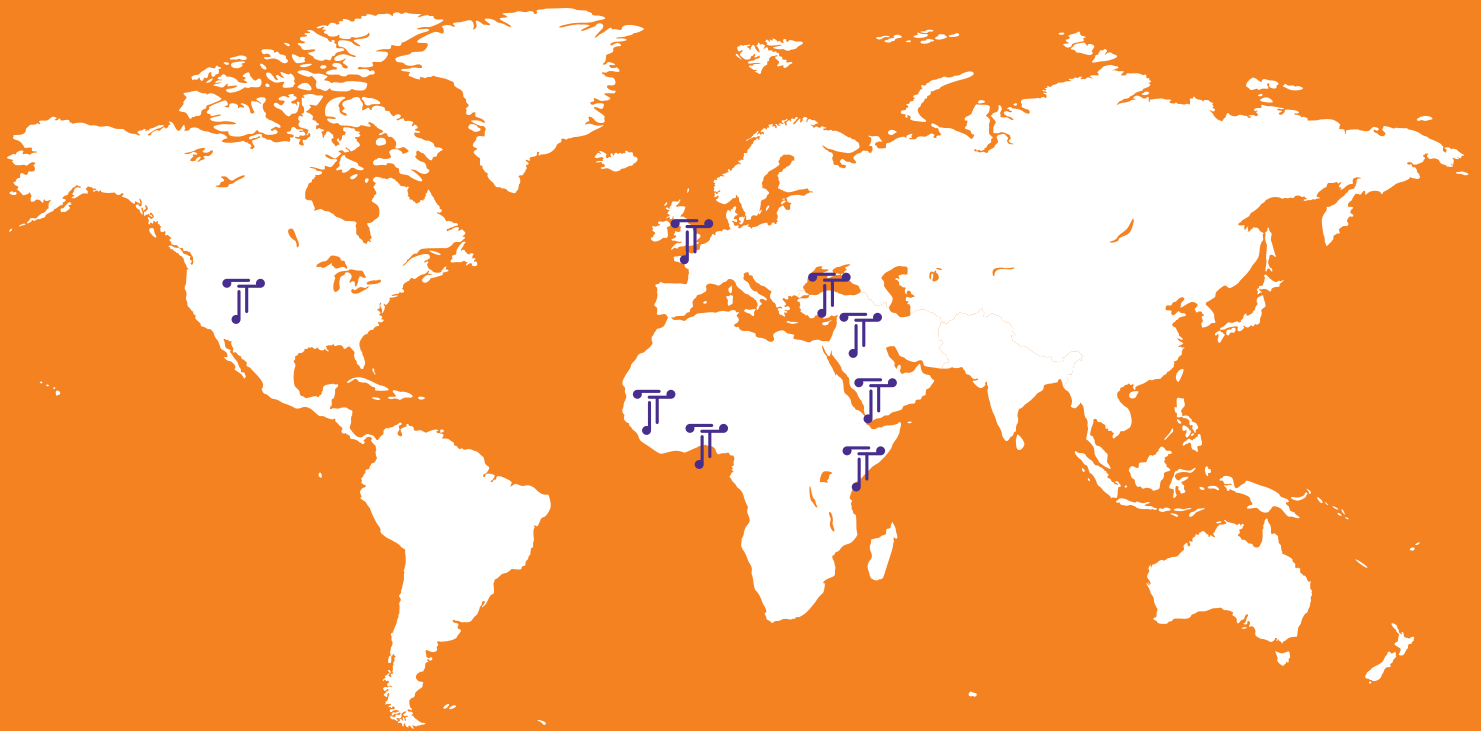

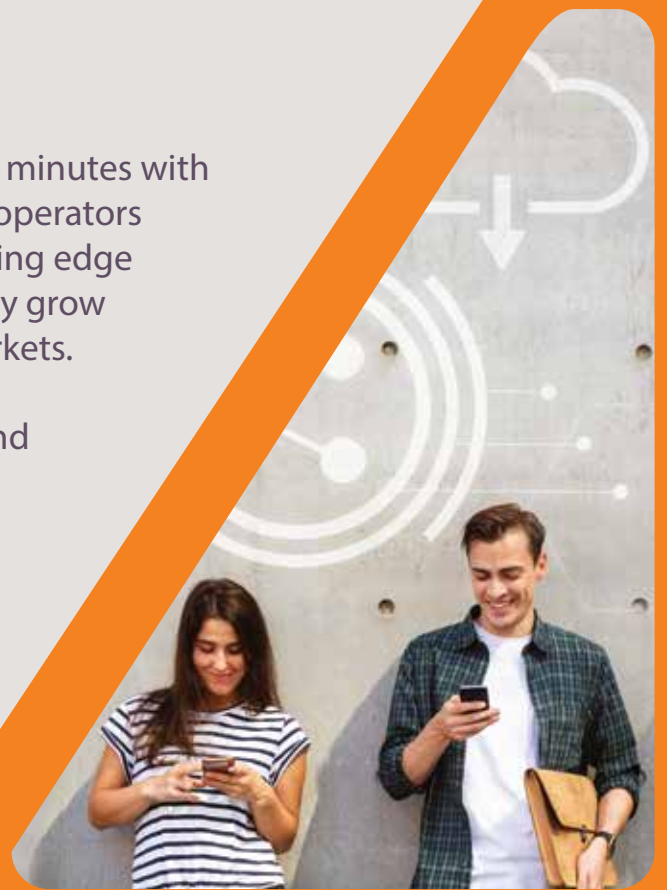

## POINT OF PRESENCE

Trust Telecom is headquartered in Istanbul, Turkey to better reach and serve the needs of emerging markets with a team of professionals located in UK, Lebanon, North Africa and the Americas. We offer one-stop-shop termination service for unified communications.

## STRATEGIC POSITION

Today, our hybrid network exchanges billions of minutes with hundreds of VoIP providers as well as PTT's and operators around the globe. Our team's experience in cutting edge technology enables our business to continuously grow our position as a market leader in emerging markets.

By investing in a high performance, scalable and robust network infrastructure, deploying a team of professionals who have vast expertise in telecoms and adapting a flexible business strategy, we are able to monitor the changes and developments around the world and adjust as needed to take advantage of economies of scale.

# CONNECTING THE WORLD THROUGH UNIFIED COMMUNICATIONS

## GLOBAL VOICE SOLUTIONS

Trust Telecom provides comprehensive portfolio to PTT's, operators and international carriers globally so they can offer a seamless roaming experience for their customers on our large hybrid network. We can terminate traffic to anywhere in the world with the highest valued route to each destination for each service grade.

## INTERNATIONAL GATEWAY

Trust Telecom's International Gateway Management Services will help clients maintain profitable operations, increase revenues due to fraud detection and improve collection metrics. Our team is highly qualified in all facets of IGW Management.

## A2P MESSAGING

Trust Telecom is your one-stop messaging platform where you can have global presence for your business messaging needs with the three C's: cost, credibility and convenience. We offer Application to Person (A2P) messaging solutions by partnering with mobile operators so you can engage and communicate with your customers in multiple regions globally with optimal connectivity and reach.

## LPWAN IoT

Deploying Low Power Wide Area Network (LPWAN) Infrastructures for Internet of Things (IoT) devices across entire cities through the development of LoRaWAN®. Any compatible LoRaWAN device can transfer data on our network. Our access points deliver roaming capabilities and support micropayment transactions so customers only pay based on network usage without needing to deploy gateways or network servers.
